Benchmarking Rapid Disease Management

Xzemplar® Fungicide, powered by BASF's Xemium technology, is the new benchmark for rapid disease management in the toughest situations. Xzemplar Fungicide offers turf managers broad spectrum preventative and curative control with unmatched efficacy at low use rates. With turf health and cost effectiveness in mind, Xzemplar Fungicide is an essential tool for best-in-class consistent performance across extensive areas.

The Science Behind

Unlike alternative Azole, Strobilurin or other Carboxamide based technologies, Xemium is actively disrupting the biosynthesis of fungi in almost all stages of the life and infection cycles from the first application.

Xzemplar fungicide, its technology and unique formulation enable it to be applied to sensitive areas with no buffer zones to bystander, natural aquatic, pollinator, vegetation and livestock areas* making it **a clear choice to ensure public and environmental safety.**

Offering broad spectrum control for the toughest diseases, including those with aggressive scarring symptoms, Xzemplar Fungicide delivers reliable, consistent performance to ensure turf health and aesthetics are optimized.

Figure 1: Extended Xemium activity unlike any other technology

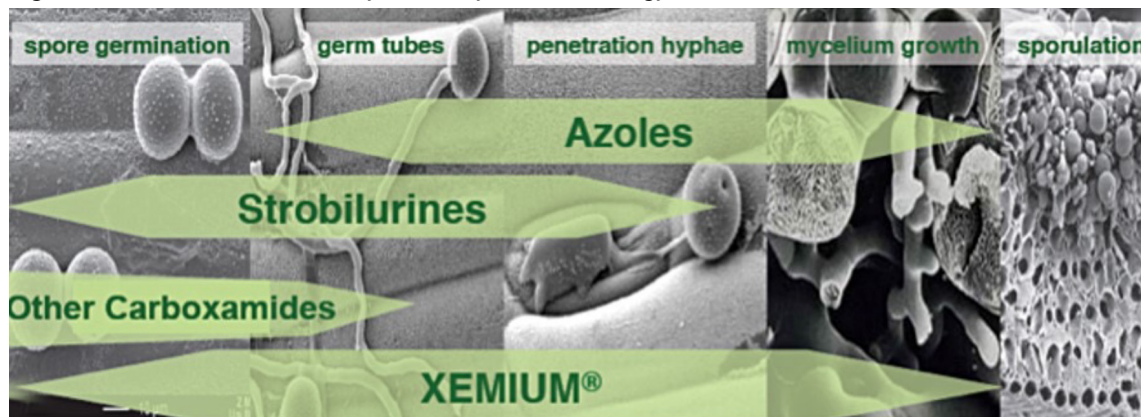

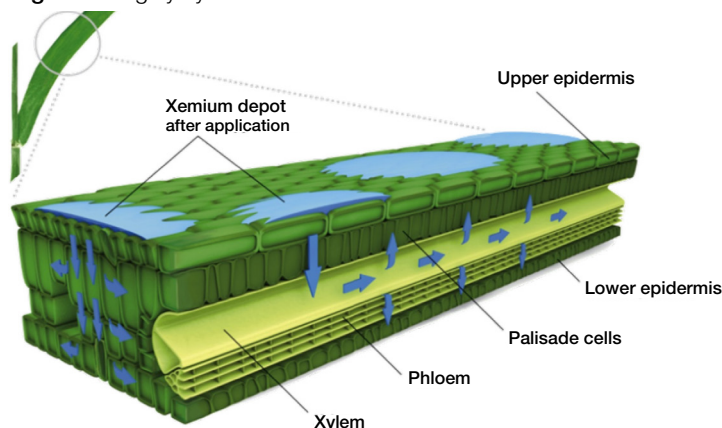

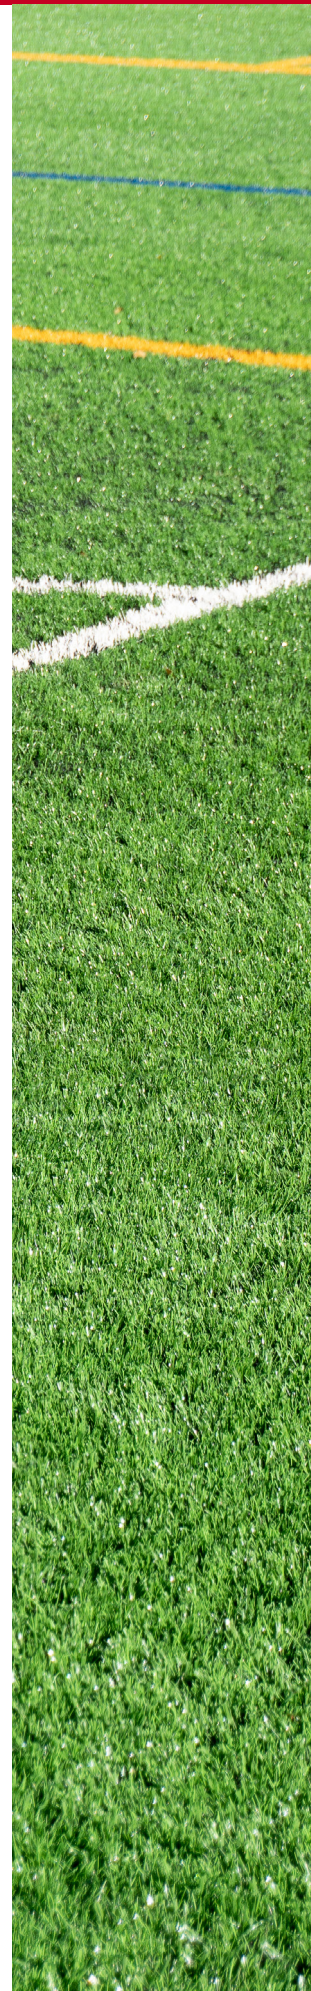

Figure 2: Highly systemic distribution of Xemium in the turf leaf

*When boom height above the target canopy is 0.5m. Refer to full label for further details and directions for use.

Rapid curative control
Within as little as four days

Consistent and reliable control
Brown patch, Fairy ring, Leaf and sheath spot, Dollar spot

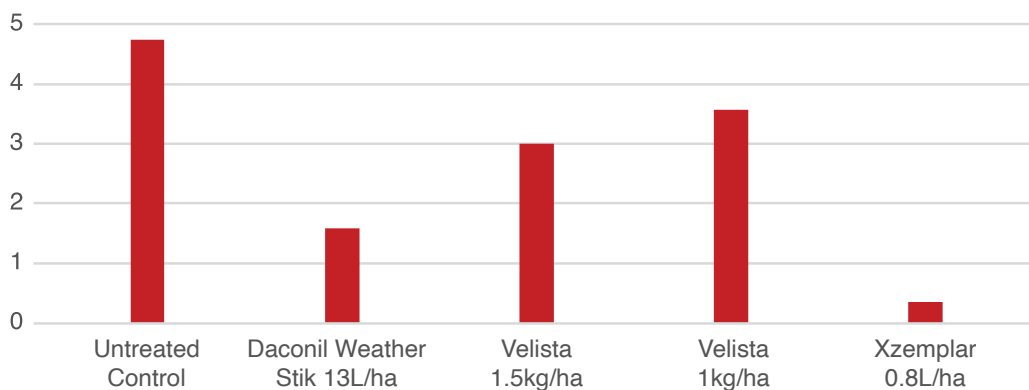

Efficacy at low use rates
0.65-0.8L/ha

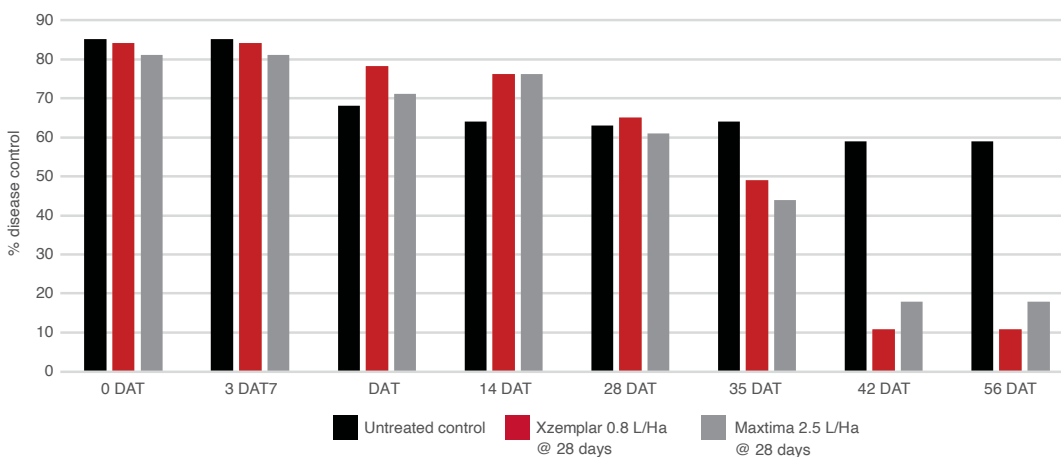

Safety to sensitive areas
Bystanders, aquatic, pollinator, vegetation and livestock areas

Dollar Spot Control 4 Days After Treatment

Controlling the toughest diseases - Fairy ring

Xzemplar Fungicide is the culmination of research combining unmatched efficacy and performance. Formulated with public and environmental safety in mind, and packaged sustainably to reduce waste, Xzemplar Fungicide is a must have tool at the forefront of disease management.
